NAME	EDUCATION MATCH	EXPERIENCE MATCH	SKILL MATCH	OVERALL SCORE	OVERALL EVALUATION
CV_Nguyen_van_A_-_Nguyen_Van_A-TopCVvn	100/100	80/100	90/100	90/100	The education match is perfect as the candidate has a Bachelor's degree in Computer Science, which is required for the job. The skill match is high, with the candidate having experience in implementing Modern Data Warehouse and Lakehouse solutions, data quality and metadata management, and working with various Azure technologies. The experience match is slightly lower, as the candidate has less than 5 years of experience in the relevant technologies. Overall, the candidate's resume closely aligns with the job description, with a strong education background and relevant skills and experience.
CV_Phan_Thanh_D_-_phanthanhd-TopCVvn	50/100	70/100	80/100	67/100	The education match is 50/100 because the resume mentions a Bachelor's degree in Computer Science, which is relevant to the job description. The skill match is 80/100 because the resume mentions proficiency in programming languages, web development, backend development, and databases, which are all relevant to the job description. The experience match is 70/100 because the resume mentions 3 years of experience as a Software Engineer, which is relevant to the job description. The overall score is 67/100, indicating a moderate match between the resume and job description.
					The education match is 50/100 because the resume does not provide specific information about the candidate's degree in IT/Computer Science or a relevant background. The skill match
